## High Quality Aluminium Structure

*The connections between elements and other components is secure and well-constructed to minimize losses and ensure stable performance over time.*

*The unique design of the yagi antenna feed which works as matching device to keep the VSWR low resulting in increased efficiency of the yagi with reflector.*

*The antenna is also be robust and reliable, with stable performance over time and in various environmental conditions.*

*A GSM Yagi antenna is a useful tool for improving the reliability and coverage of GSM networks, and can be used in a variety of applications.*
